

Suyash Batham

Frontend Engineer | React.js Developer

Gurgaon, India | +91-9336203569 | suyashbatham001@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Frontend Software Development Engineer with 4 years of experience building enterprise web applications using React.js, JavaScript, WordPress, Gutenberg, HTML5, and CSS3. Skilled in developing component-driven interfaces, integrating REST APIs, and building dynamic content systems for large-scale platforms. Delivered 20+ reusable UI components while maintaining responsive, cross-browser performance across enterprise digital platforms. Experienced in Agile development, Git-based workflows, and CI/CD pipelines, with a strong focus on scalable, maintainable frontend architecture.

Technical Skills

Frontend Development: React.js, JavaScript (ES6+), JSX, React Hooks, Context API, Redux, HTML5, CSS3

UI Engineering & Performance: Reusable Components, Component Architecture, State Management, DOM Manipulation, REST API Integration, Cross-Browser Compatibility, Performance Optimization, Caching Strategies

Backend, Database & CMS: WordPress, PHP, Python, SQL, REST APIs, Dynamic Content Systems

Testing, Accessibility & Analytics: Jest, React Testing Library, WCAG, ADA, Deque Axe, GA4, GTM

DevOps, Tools & AI: Git, GitHub, GitLab CI/CD, Jenkins, Jira, Visual Studio Code, Gen-AI Tools

Professional Experience

Software Development Engineer, Wipro Limited

Sep 2022 – Present

Client: Blackstone | *Project:* Martech Platform | *Team:* DDL/BAU

- Architected a **cookie-based investor eligibility gating system** using JavaScript, DOM Manipulation, modal workflows, and REST API integration to dynamically control access to investor-specific content.
- Optimized **2 high-traffic Blackstone production pages**, Our People and Insights, by implementing React-based incremental **Load More** functionality for **900+ people profiles and large volumes of insight content**, reducing initial DOM rendering and improving page performance and user experience.
- Built and delivered **20+ reusable frontend components and UI modules** using React.js, JavaScript, and Gutenberg, improving consistency and enabling scalable content-driven page development.
- Solely developed a **multi-screen investor attestation system from the ground up**, implementing configurable Accept/Decline workflows and frontend validation for compliance-driven gated content experiences.
- Implemented **GTM/GA4 tracking across 15+ components** and resolved **50+ ADA/WCAG accessibility issues**, while diagnosing cross-browser and iOS-specific frontend issues to improve production stability and usability.

Projects

Personal Portfolio & React Playground

Live Demo | GitHub

React.js, JavaScript (ES6+), React Router, CSS3, LocalStorage, Vercel

- Architected and developed a responsive, component-driven React application with **reusable UI architecture, React Router, centralized state management, and performance-focused rendering**, implementing scalable component patterns and responsive layouts across desktop and mobile devices.
- Built an interactive **React Playground and contact management system** featuring multiple state-intensive applications and workflows, applying **useReducer, useMemo, useCallback, client-side validation, protected admin access, drag-and-drop interactions, undo/redo, search/filtering, and persistent state management** to demonstrate scalable frontend architecture and optimized state handling.

Education

Bachelor of Technology in Computer Science, GLA University

Aug 2018 – May 2022

CPI: 7.85

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Technology Associate: Security Fundamentals (98-367)

Awards and Achievements

- Rockstar Rookie Award** for frontend development contribution and UI solutions.
- Dream Team Award** for collaboration and team execution.
- First Position**, IBM ICE Day Competition.
- Open Source Contributor**, HacktoberFest.
